DETAILED ACTION

1. The amendment filed June 2, 2005 has been received, entered and carefully considered. The amendment affects the instant application accordingly:
 - (A) Claims 2, 3, 8, 9, 15 and 16 have been canceled;
 - (B) Claims 1, 4, 6, 7, 10, 12, 13, 17 and 19 have been amended;
 - (C) Comments regarding Office Action have been provided drawn to:
 - (I) 2nd paragraph rejection, which has been withdrawn;
 - (II) Non-Compliant amendment, which has been withdrawn.
2. Claims 1, 4-7, 10-14 and 17-19 are pending in the case.
3. The text of those sections of title 35, U. S. Code not included in this action can be found in a prior Office action.

Allowability of Claims Withdrawn

The indicated allowability of claims 7, 11-14, 18 and 19 is withdrawn in view of the Ferguson (US Patent No. 5,520,926, already of record). A rejection based on this reference follows.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 7, 10-14 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferguson (US Patent No. 5,520,926, already of record).

Applicants claim method for increasing levels of glycosaminoglycans in skin comprising applying to the skin a composition containing an effective amount of a mannose phosphate. Additional limitations in the dependent claims include the mannose phosphate being mannose-6-phosphate, the use of a specific amount of

Art Unit: 1623

mannose phosphate, and the method having specific skin conditions, which include dry skin, lines and wrinkles, and symptoms of chrono- and photoaging.

The Ferguson patent discloses mannose 6- and 1-phosphates as being useful in the treatment of fibrotic disorders (see abstract). See column 4, lines 28-31, wherein the Ferguson patent discloses the invention thereof as being "primarily of interest in relation to skin wounds, whether arising through surgery or other wise, including severe abrasions laceration and burns, but is also applicable to fibrotic disorders, which includes photo-damage." See the examples disclosed in the Ferguson patent wherein the amounts of mannose phosphates used in the treatments are disclosed, which appear to be within the scope of the amounts of mannose phosphate set forth in the instant claims. The use of mannose phosphate to treat fibrotic disorders, which include and photo-damage, in the Ferguson patent anticipates the instantly claimed method of increasing levels of glycosamioglycans in skin, since the instants claims disclose that photoaging of skin is a condition associated with reduced level of glycosaminoglycans in the skin (see instant Claim 14).

6. Applicant's arguments with respect to Claims 7, 10-14 and 17-19 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

7. Claims 1 and 4-6 are allowed.

Reasons For Allowance

8. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest applying a mannose phosphate to skin in a method to exfoliate skin.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Summary

9. Claims 1 and 4-6 are allowed; Claims 7, 10-14 and 17-19 are rejected.
